COMMENTARY

Pharma sector ke stocks me recently ek special price action pattern dekhne ko mil raha hai — jo ki trend reversal ya bullish confirmation ka signal de sakta hai.

April Month:

April ke mahine me hammer candle form hui thi — jo ek trend reversal pattern hota hai, especially jab yeh downtrend ke baad banega. Hammer candle ka matlab hota hai ki market ne din (ya mahine) ke dauraan neeche girne ki koshish ki thi, lekin buyers ne price ko upar kheech liya, aur closing strong hui.

Is hammer candle ke sath high volume bhi tha — jo is pattern ko aur bhi strong banata hai, kyunki yeh dikhata hai ki buyers actively enter kar rahe hain.

May Month:

May ka candle bhi bullish bana, aur uski closing April ke hammer candle ke high ke upar hui — jo ek confirmation deta hai ki buyers ab control me hain, aur uptrend shuru ho sakta hai.

Kya Signal Mil Raha Hai?

Yeh combination (hammer candle + bullish confirmation candle + high volume) generally ek short-term ya medium-term trend reversal ka indicator hota hai. Iska matlab yeh ho sakta hai ki pharma sector me ab positive momentum develop ho raha hai, aur aane wale weeks ya mahino me upside movement dekhne ko mil sakti hai.
